Properties

RC-security rose in a matt polyamide steel composite with a cylinder cover, external rose, diameter 58 mm, 16 mm high, lower part with integrated cylinder cover with supporting enclosure, conically shaped as protection against forced twisting off, additional anti-drill protection implemented as an anti-drill protection plate with dimensions 32 mm x 74 mm. The anti-drill protection plate must be fixed, by bonding onto the lockcase with adhesive near the profile cylinder before mounting the lock. Internal rose FS version, diameter 55 mm, 10.5 mm high, concealed screw fixing, for paired mounting, supplied with screws M 5, holes for profile cylinder (PZ), for cylinder projection: 10.5 - 15 mm.

The security rose conforms to the requirements of DIN 18273

Protection class: ES 1 pursuant to DIN 18257, can be used on anti-burglary elements pursuant to DIN EN 1627-1630
